### Summary

Product Designer with 5 years across fintech, B2B SaaS and e-commerce, working remotely with distributed teams in Canada and Europe. I focus on where product usually stalls: turning business decisions into specs engineering can build without guessing. I build and scale design systems, design transactional flows in regulated contexts, and document interaction, states and edge cases for handoff. My research work is fully remote: moderated user interviews over video call and unmoderated usability tests.

### Skills

- UI Design
- UX Design
- Interaction Design
- Information Architecture
- User Flows
- Prototyping
- Design Systems
- Design Tokens
- Developer Handoff
- Accessibility (WCAG)
- User Interviews (remote)
- Usability Testing
- A/B Testing
- Heuristic Analysis
- Agile Methodologies
- Figma
- Adobe Photoshop
- Adobe Illustrator
- AI-assisted design workflow
- Responsive and Adaptive Design

### Experience

#### Product Designer (Independent)

Bravanz and independent projects, Remote - 2026 - Present

- Bravanz, a design agency serving companies in Japan: UI and branding for client projects. Designed solo the design system, UI and flows for a law firm's client platform where clients follow the status of their legal cases.
- Designed a multi-language website (Japanese, Portuguese and Turkish) for a beauty salon in Japan, covering the service catalog, online booking and post-service feedback.
- Drake Trade: designed and launched a real-money trading marketplace for in-game items and currencies, built with AI-assisted development tools and deployed on Vercel.

#### Product Designer (UI/UX Designer)

Blaze Ecom, Remote (Europe) - August 2024 - April 2026

- Designed the Campaign Builder platform from zero to one as the sole designer, working directly with a PM: information architecture, component architecture, user flows and interaction specs for an internal product that did not exist before.
- Built and scaled a design system of 200+ documented components, consumed by 8 engineers and 4 product teams, establishing a single source of truth for UI.
- Redesigned high-traffic product pages with conversion as the primary success metric, prioritizing changes through heuristic analysis and competitive benchmarking.
- Ran A/B tests on conversion pages and usability testing on transactional flows, using results to validate hierarchy decisions and surface friction ahead of implementation.
- Documented interaction behavior, states and edge cases for handoff, cutting rework between design and engineering.

#### Product Designer (UI/UX Designer)

KoreConX All-In-One Platform, Remote (Canada) - October 2021 - August 2024

- Built and maintained the design system spanning four products (KoreConX, KoreTransfer, KoreID and Kore.Builders), unifying components and documentation standards across teams.
- Designed KYC and investor onboarding flows in a regulated financial context, focused on reducing cognitive load; document-upload drop-off fell by 22%, measured via analytics with the marketing team.
- Created the handoff methodology using numbered annotations by category (interaction, business rule, data and content, states, accessibility), adopted for the most complex screens in the product, such as the investor dashboard.
- Led product design initiatives, partnering directly with engineering and stakeholders.
- Iterated on landing pages, product pages and internal tools based on stakeholder feedback and competitive benchmarking.

### Art Director

Content House / Agência KR, São Paulo, Remote (Brazil) - March 2021 - September 2021

- Led visual direction for digital campaigns and the team's move into interface and user experience work.

### Education

#### Bachelor's Degree in Advertising

Centro Universitário Padre Anchieta | 2020 - 2024

### Languages

Portuguese (native) | English (fluent, C1)
